

## CAPABILITIES STATEMENT

### *Environmental Remediation Data & Imaging Experts*

- *Reduce Your Cleanup Costs by 40%*
- *Remediation Site Characterization and Diagnostic Evaluation*
- *Global Deployment of High Resolution Investigation Tools*
- *Real Time Data & Results Delivered to Any Device*

### **CORE COMPETENCIES**

#### *Global Deployment of High-Resolution Site Characterization Tools*

to map the full extent of contaminated land in support of remediation design, evaluation of failed remediation efforts, followed by optimization of existing remediation systems.

*Optimization of Remediation Systems* through a systematic evaluation of installed systems, in-situ geochemical and hydraulic parameters, contaminant distribution, and transport pathways to establish performance metrics for future liability management.

#### *SmartData Solutions® Real-Time Data, Real-Time Results in the Cloud*

- **Best Data.** High-resolution 3D presentation of the extent of soil and groundwater contamination.
- **Deepest Understanding.** A complete overview of local site geology, hydrogeology, geochemistry, and contaminant chemistry.
- **Pinpoint Recommendations.** More accurate delineation for the best possible remediation design.

### **DIFFERENTIATORS**

- Global delivery combined with a nation-wide network of service centers.
- 22 years of high-resolution site characterization experience and diagnostic evaluation of failed remediation efforts
- Cloud-based decision support system for real-time information delivery
- Experienced exporter with operations in Latin America and Africa
- Strong health and safety focus with record of Zero Lost Work Days
